**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. In Claim 1, the phrase "in particular" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d); antecedent basis is lacking for "the primary components". Claims 2-8 are incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the relationships between the "drive module" and the "gear module" in the dependent claims with the "starter motor" and "reduction gear" in the parent claim. In Claims 3 and 8, antecedent basis is lacking for "the drive module". In Claims 4, 5, 7 and 8, antecedent basis is lacking for "the gear module". In Claim 6, antecedent basis is lacking for "the planetary gear". In Claim 8, antecedent basis is lacking for "the electronic module"

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Isom, et al., cited in Applicant's IDS.

Isom discloses starter motor 10, reduction gear (15,16,17), and pinion 18. Regarding the phrases "can be expanded" and "can be combined", it has been held that the recitation that an element is capable of performing a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138.
